## OneVision Project Services

OneVision Project Services Australia Pty Ltd is an Australian owned multi service organization. We have a skilled team of professionals that have been in our industry for over 15 years providing façade cleaning, building maintenance, height safety and access solutions. Our client base includes strata, commercial, construction, industrial, heritage, government and telecommunications. We pride ourselves on having a strong referral network. Due to the wide scope of our services our business is set up into 3 main areas.

1. Façade Cleaning – (All external façade cleaning works)
2. Building Maintenance ( All trade services for external maintenance )
3. Height Safety and Access Solutions ( All systems for access to roofs and facades)

OneVision provides **professional services** of height safety and building consulting, inspection reports and project management.

## Service

Whether it be for our clients, staff, contractors, managers or owners all our information provided is transparent easy to share and understand. OneVision's Professional Services are an essential part of our company and should you require one trade, a scheduled maintenance program, ongoing repairs or a complete facade upgrade OneVision is committed to providing you **THE SERVICE EDGE!**

## Safety

All OneVision operators are committed to a safe working environment and act in accordance with Australian and New Zealand Standards and codes, OHS Laws as well as our own safety manual. All staff have necessary training and licenses. A site specific risk assessment & work method statement is carried out prior commencement and is reassessed daily throughout the duration of all works. We are fully insured by Workers Compensation insurance, Public Liability and Professional Indemnity for up to \$20,000,000).

Onevision has close working relationship with work cover to ensure best practice.

## Solutions

**The advantage** of consulting with OneVision Project Services is that we approach each project with multiple view points in mind including.

1. Your specific client requirements
2. Your budget
3. We review options in the market and provide you with a summary of the most appropriate solution for the works
4. The users or the trades person
5. The maintenance short term and long term
6. Compliance and safety regulations

Many clients have experienced seamless management of their projects and high quality results by consulting with OneVision. They have also received reductions in their costs and shorter timeframes of works.
